1 Browser Compatibility Requirement

The NLS is compatible with the following browsers for **PCs/desktops**:

| Operating System (Minimum Requirement)	Browser Version
All Windows 10 Edition	Internet Explorer 11 (read more in **Section 2**) Firefox 84 (read more in **Section 3**) Microsoft Edge 87 Google Chrome 87

2 Using Microsoft Internet Explorer 11

You need to enable IE11 compatibility View setting if you are using IE 11 to browse NLS. Follow the below steps sequentially and do this configuration one time.
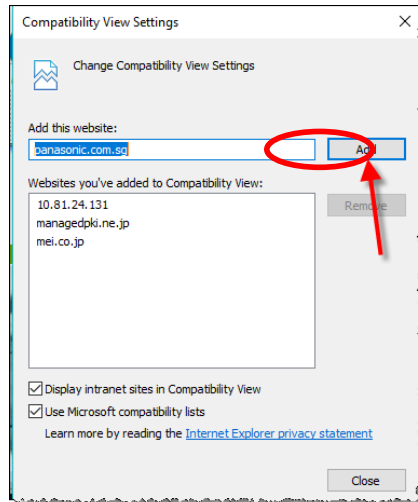

a) Open IE 11 browser

b) Go to NLS website

c) Click the Tools icon located at the top right hand corner of browser

d) Click Compatibility View settings

e)   In the Compatibility View Settings window, click Add button.

f)   NLS website domain **panasonic.com.sg** will be added to the IE11 Compatible View list. Click Close button to close the window and you may begin using IE11 to browse NLS.
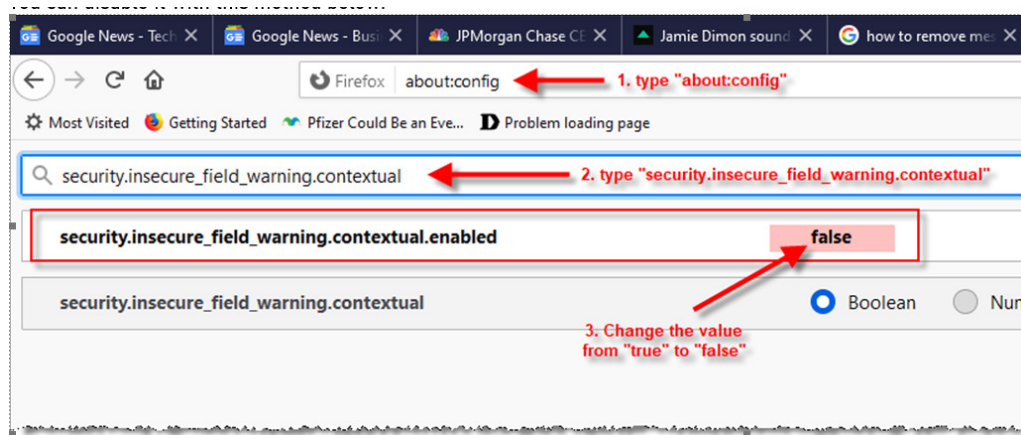

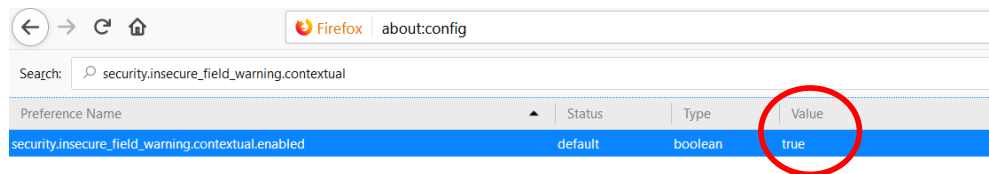

3   Using Mozilla Firefox

When you use Mozilla Firefox to browse NLS, you may see a warning message like "This connection is not secure. Logins entered here could be compromised. Learn More" will appear. There is no cause for concern, you may either ignore or turn off the warning message by follow the below steps. (If you did not see the warning message, you may skip this section and begin using Firefox to browse NLS.)

a.   Open Firefox browser

b.   Open Firefox Configuration Editor by typing in browser Address bar **about:config**

c.   To locate the exact Firefox setting, type the following string in the Search bar, **security.insecure_field_warning.contextual**

d.   If the value is true, double click anywhere within the blue space to change the value to false. The warning message goes away when the value is false.

e.   You may begin using Firefox to browse NLS.
